# MATERNAL BREAST MILK VS DONOR BREAST

- Maternal breast milk
  - Advantages
    - Whey : casein ratio – 60% :40%
    - Contains enzymes – aides digestion
    - Antibodies/immunoglobins
    - Contains bacteria – natural probiotics
    - NEC risk reduction
    - Cost efficient
  - Disadvantages
    - Low protein content in preterm milk
    - Lower vitamin D/mineral content
    - Stress can lead to decreased production

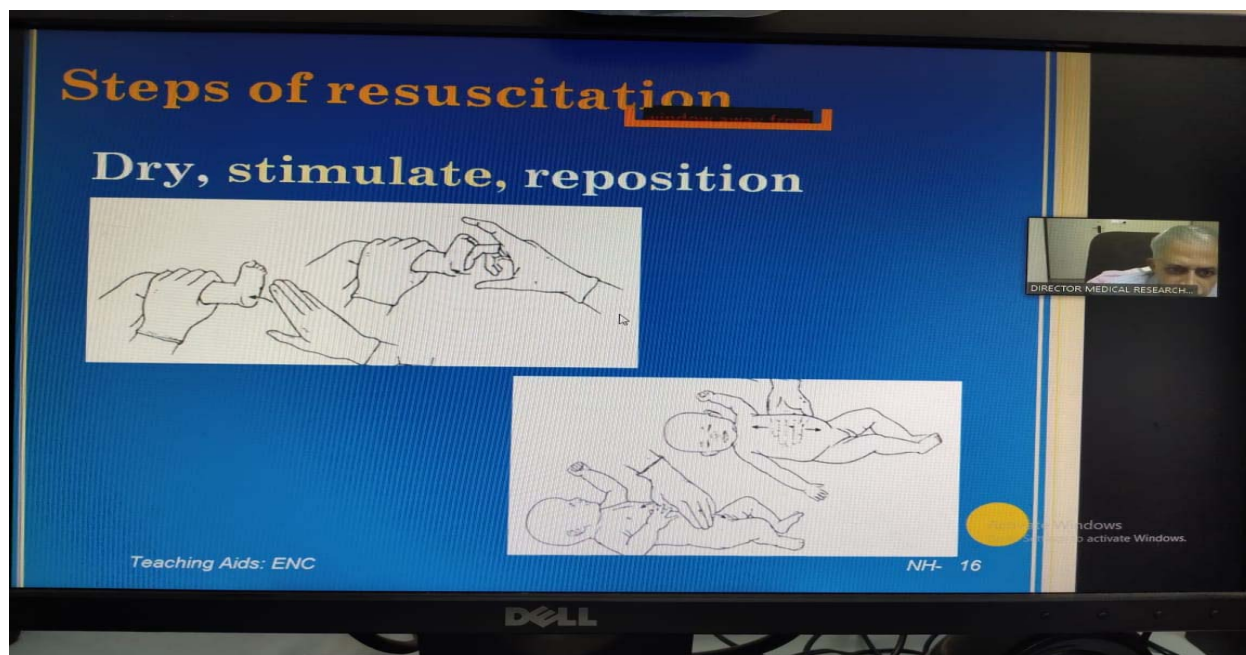

**Mrs. A. Gothainayagi, lecturer, delivering the lecture**

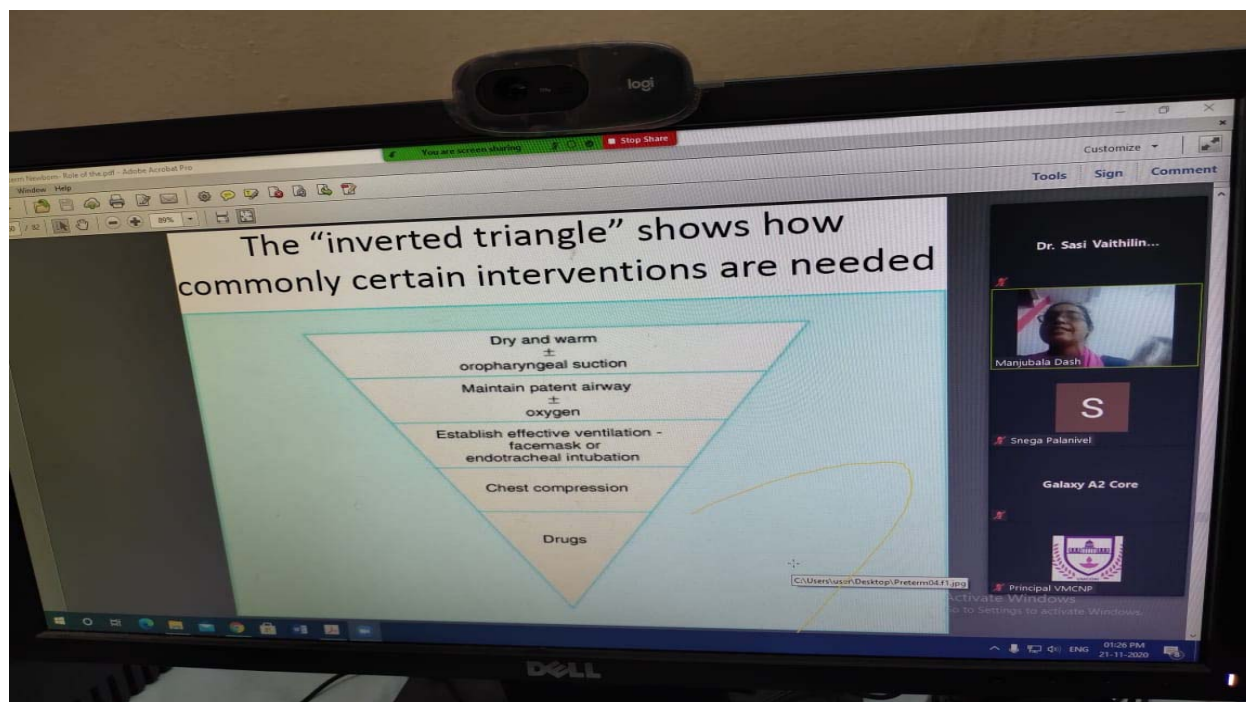

## **Day 2: 21.11.20**
